

The same procedure as every year...
Now they are slowly disappearing in
the drawers: the year-end giveaways in
form of coffee mugs, noble ballpoints
and designer corkscrews with the
"personal" touch.
Did they fulfil their purpose in this way?

Creative presents.

PyCom: Manufacturer of drawing instruments, chalks for schools, writing and painting "Made in Germany".

The company PyCom was founded 1950 – at that time still known under "Kreidefabrik Jürgen Knopf" – in Hehlen in the Weserbergland. In the beginning the production covered only an area of 24 m² whereas we today produce on an area of 2,000 m². Since 1950 we produce in our own facilities – without interruption – chalk for writing and painting "Made in Germany". In the following decades the quality and design of our products were continuously improved and further developed. For example in the first years the chalk was still cast in blocks and then cut in pieces. Today in the course of process optimization

the individual bits of chalk are already cast into prefabricated molds.

Sidewalk chalk of our production is only genuine with the "CC Fun" logo being individually embossed in each piece of chalk. Due to a high manufacturing depth PyCom is also very flexible and competitive with regard to special requests of customers. At home and abroad the name PyCom stands for quality and reliability. In the meantime there are business contacts around the globe: from Germany to the rest of Europe and the Far East through to Australia.

Chalks for writing and painting from PyCom.

Many well-known companies are already convinced of our quality and have given priority to our products over imported goods.

Product sample of PyCom

Sidewalk chalk is creative.

Children love it and it is simply something different. The chalk is produced without any toxic additives and extenders. Certified by Buero Veritas (according to the valid toy standard).

Made in Germany

in a traditional chalk-factory located at the very top on the hill Ith in the Weserbergland .

Powerful colours in a pack of six

We don't save on colour pigments. Therefore all colours are bright and strong.

On request with glitter effect...

We add the chalk fine gold or silver dust. Not only on the outer surfaces. The whole chalk line glistens and sparkles

No dusty fingers anymore.

All chalk pieces are provided in the production with a wafer-thin finger protection film. Chalk dust is a thing of the past. On request we will gladly send you the punch.

Creative advertisement – individual packing.
